Make Your Own QR Codes

Written By: Tom

🔧 **TOOLS:**

- pc or mac ,printer optional, qr code reader (1)

SUMMARY

Make your own QR codes to put anywhere or maybe use in business or just for fun.

Have fun!

Step 1 — Make Your Own QR Codes

- Visit the website http://www.qrstuff.com.

Step 2

- You may know what to do from here.
- Choose the data type, website URL, wi-fi login, text doc, YouTube video, Facebook, Twitter, iTunes link, Skype call, email address, or whatever you want to point to.
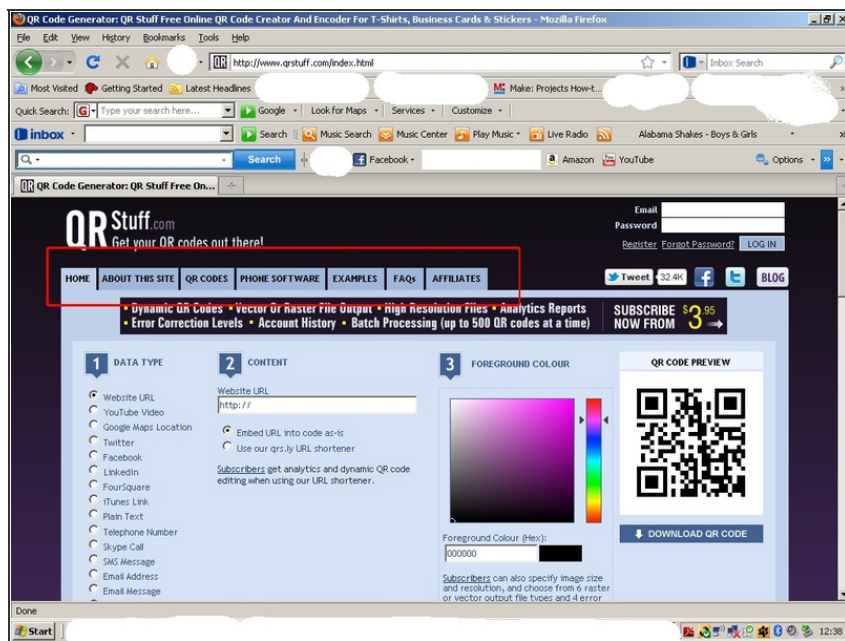

Step 3

- Enter the website URL if it is a website URL.
- And change the color if you want.

Step 4

- Then select print, download, email, and so on.

Step 5

- Also on the website http://www.qrstuff.com, it tells you all about QR codes: what they are and where to get the readers/scanners.
